Applicant:	Richard Cornelius	
Serial No.:	09/470,039	
Filed:	December 22, 1999	Group Art Unit: 3627
Title:	INITIATING AN AGREEMENT IN AN E-COMMERCE ENVIRONMENT	Examiner: F.I. Ehichioya
Docket No.:	60021-339201	

CERTIFICATE OF TRANSMISSION

Publishing Division
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

I hereby certify that these papers and fee(s) are being deposited with the United States Postal Service "Express Mail Post Office to Addressee" service under 37 CFR 2.198 on November 17, 2005, and are addressed to Publishing Division, Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.

Janet Byrne

RESPONSE TO NOTICE TO FILE CORRECTED APPLICATION PAPERS

Dear Sir:

In response to the Notice to File Corrected Application Papers (copy attached) for the above-identified application, please accept missing page 339 of the specification.

The Commissioner is authorized to charge any fees associated with this filing to Deposit Account No. 50-1901 (Reference No. 60021-339201).

Respectfully submitted,

By: 
Rudolph B. Hofmann, Reg. No. 38,187

Implementation Considerations

Will devices need to be shutdown / started remotely as well as be automatic or manual (e.g., using scripts, embedded in schedule)?

5 If expertise will not be available locally, it is imperative that remote control of the startup / shutdown processes be available. The presence of skills, the availability of tools, and the uniqueness of the application / environment will dictate whether or not startup / shutdown is automatic or manual.

How will clean shutdowns of all processes be ensured?

10 If a system failure takes place, it is important that all processes be shut down well, to ensure that the processes can be re-started and that the integrity of the information will be maintained.

In what order will hardware and software components be started / shutdown?

15 Based upon the technical requirements of the system (e.g., databases should be started before applications) as well as defined service levels (e.g., one particular application is critical and must be started first), the order of startup / shutdown will be determined.

Are periodic re-boots required (e.g., to clean up memory)?

If this is necessary, automatic/manual startup/shutdown of the system should be scheduled (e.g., UNIX systems require this).
